07/08/2020 – CURRENT

SOFTWARE DEVELOPER/ QUALITY ASSURANCE – FREELANCER

1. This project is called "E-Wallet". It helps people get necessary money communicating with other people and turn their money plus interest back with Pay Pal. The "E-Wallet" application helped me learn so much about MVC and C# language. I and my two friends won an award for this idea and its business plan.
2. Project: PontusHMS Software Developer for PontusHMS. Involved in architecture and design, coordination of training and testing activities, introducing new functionalities, bug fixing, implementing data access, programming CRUD operations, and responsive user interface. This project was at its beginning, so I have developed dashboard reports and optimized their performance. Designing and customizing complex search queries have also been my focus. Development and implementation based on Visual Studio 2015, SQL Server 2012, ASP.NET 4.0, MVC, Visual Studio 2008 (AESS Framework).
3. Project: Building 4 Websites (Visit Himara, Pontus HMS) • Main activities and responsibilities Project includes configuration of the latest version of Umbraco CMS, installing themes, and customization of those themes based on client requirements, and upgrade of the old version. Development and implementations based on Umbraco CMS, MVC, .NET platform, ASP.NET 4.0, Microsoft SQL Server 2012.

I've worked as a Quality Assurance Engineer for more than 2 years. I'm truly passionate about my work and always eager to learn new technologies. I'm specialized in web testing and mobile testing. I can create test processes and documentation from scratch (using Test Management Tools: TestRail, VSTS, JIRA). Meanwhile, I have participated in more than 15 projects and am able to work on more than 4 projects simultaneously. Performing such types of testing: Manual Exploratory Functional System Regression Tech Skills: - Basic knowledge of HTML, CSS, SQL for Software Testing; - Development and execution of test cases, checklists,

use cases; - Regression, acceptance, smoke, functional testing; - Defects creation/verification; -Project Handover Documentation ; - Preparing test reports/test plans; - Work with the client: requirement analysis, stand-ups, and leading demo; - Release support and smoke testing on Production; - API testing (Postman); - Projects were developed and delivered using AGILE methodology; - Reviewing project requirement documents, functional specifications; - Working with bug tracking systems (JIRA, Azure Devops, TestRail, Asana,Trello); - Test Management Tools - TestRail, Zephyr, Azure Devops - Compatibility testing - BrowserStack Soft Skills Excellent Analytical and problem-solving skills Strong Written and Verbal Communication Willingness to Learn New Technologies Ability to work efficiently in a fast paced Environment Attention to detail Ability to work independently and in team-based Environment Strong interpersonal and presentation skills.
